RentalPoint Technician Web Calendar

Last Modified on 31/08/2026 1:01 pm EDT

Full Video Demo of RPWebServices for RentalPoint

This add on allows technicians to log on, view their jobs on a calendar, accept jobs, update their contact, primary and secondary skill details.

This video shows:

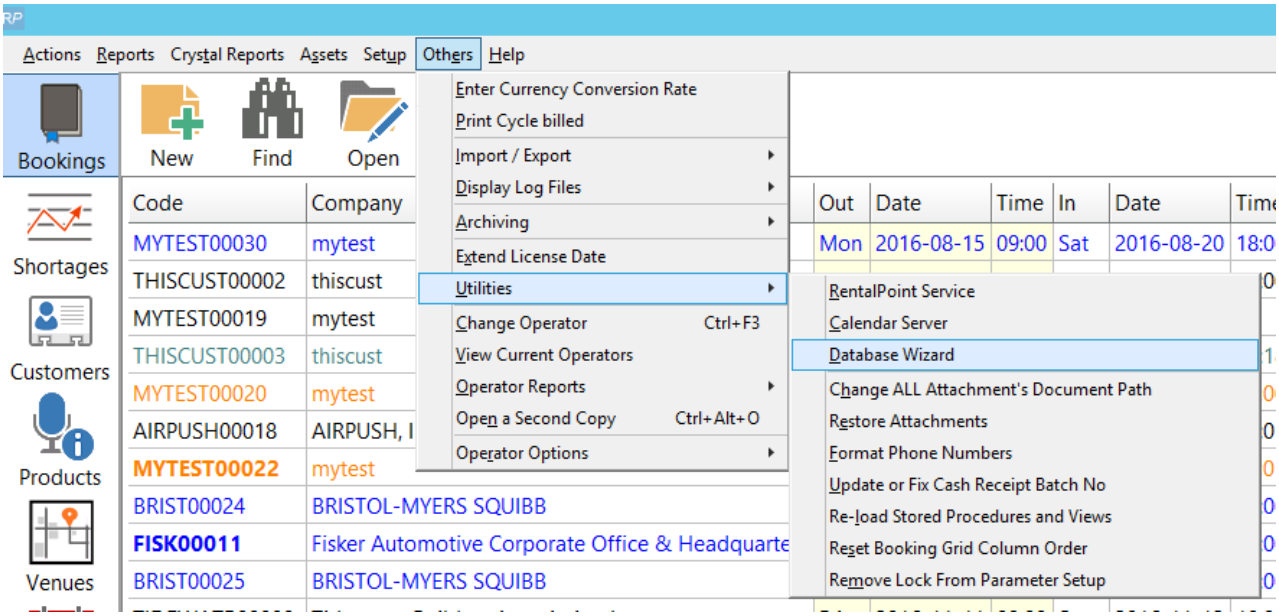

1. The web browser based view of the RPWebServices add on for RentalPoint desktop
2. The main RentalPoint desktop and how it interacts with the technician calendar.

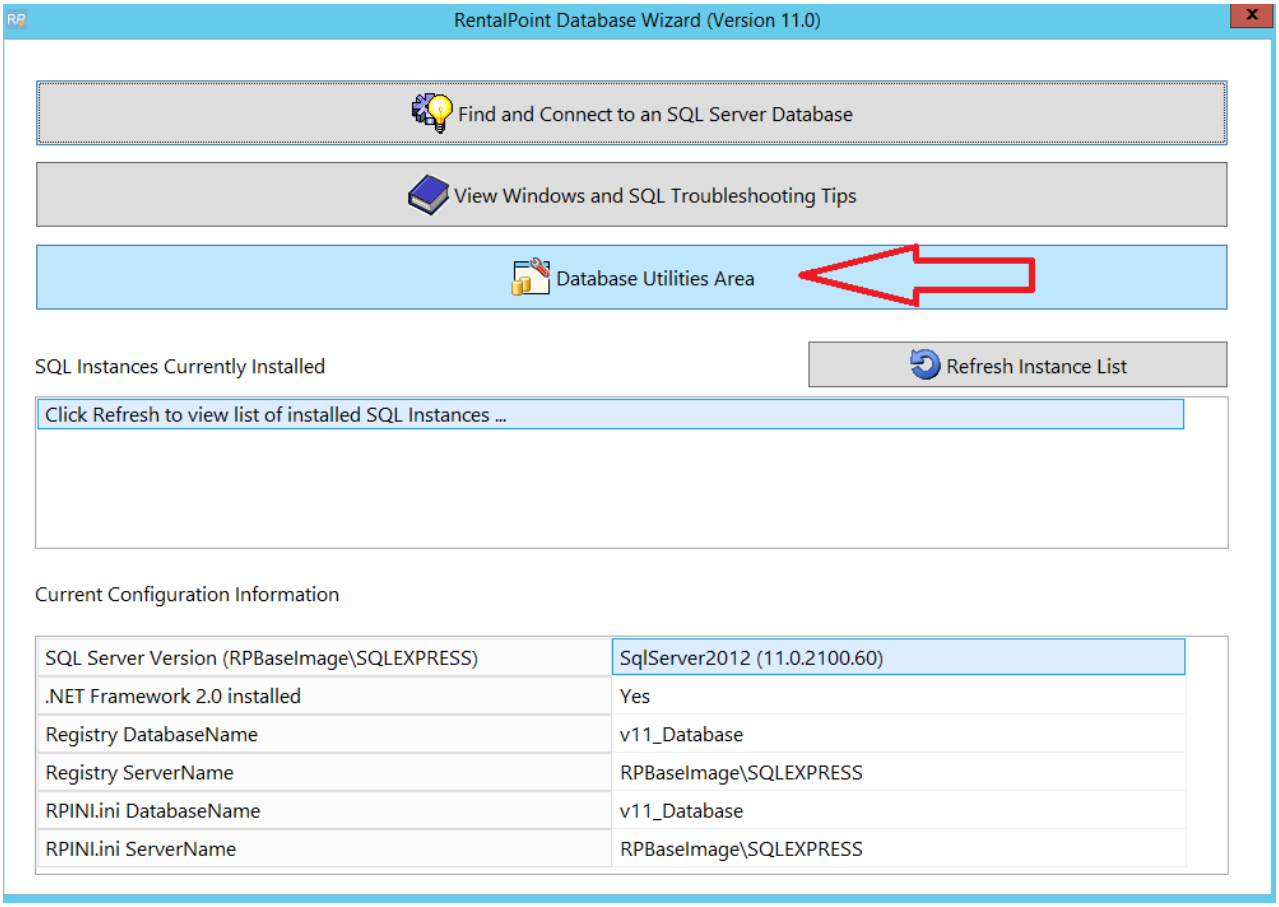

How to use RPWebServices for RentalPoint

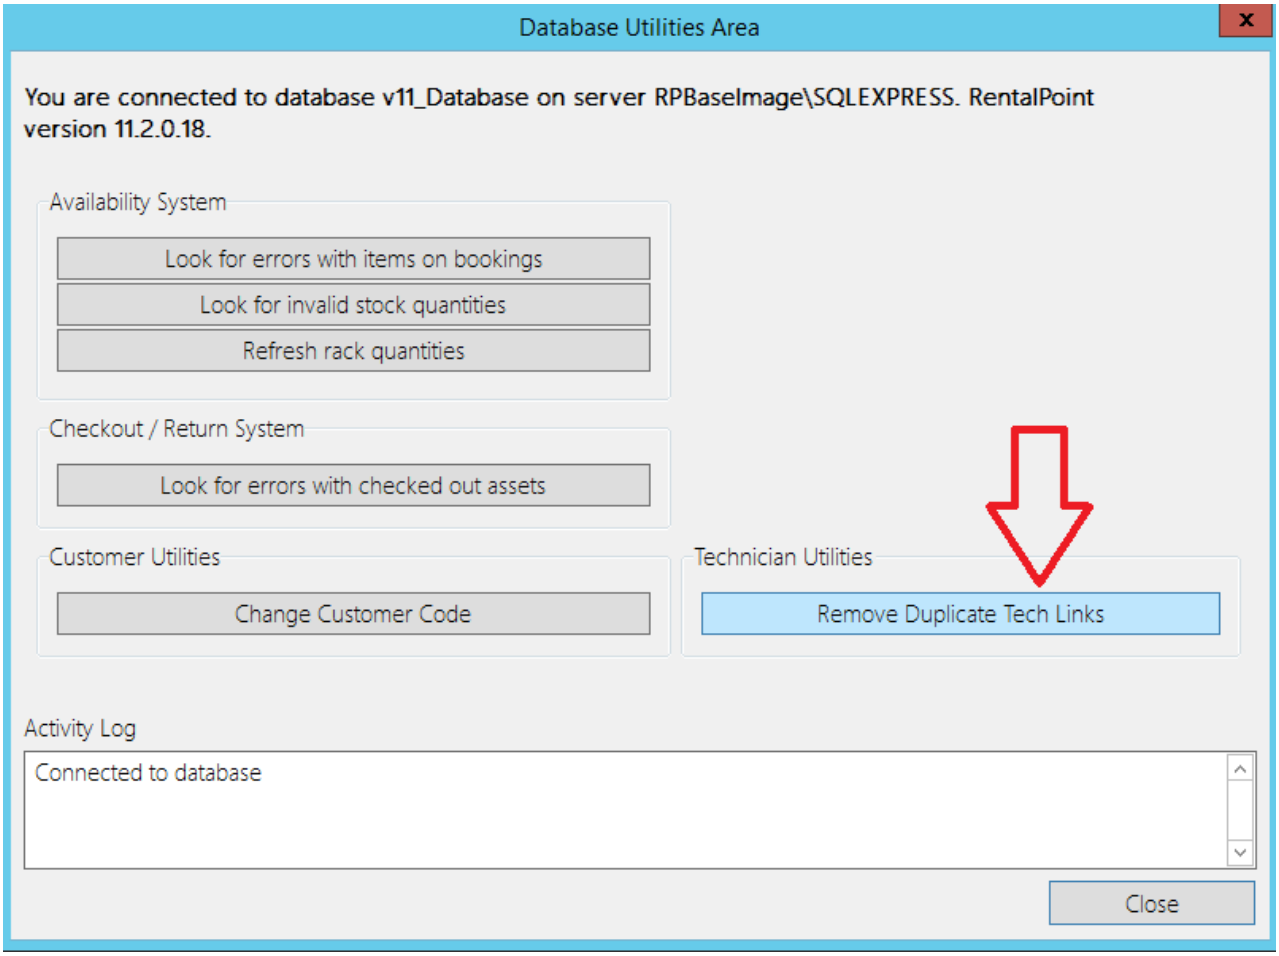

Remove Technician Duplicates

A technician is linked to a designation via tblBill. However if there are duplicate entries in tblBill for the same tech and the same designation, the system will not save the rates correctly.

A utility has been added to the DatabaseWizard util to remove duplicate entries in tblBill.

RentalPoint Database Wizard (Version 11.0)
Find and Connect to an SQL Server Database
