

Most/Least Popular Products

Last Modified on 07/26/2018 2:29 pm EDT

Date: Feb 2016

The Most/Least Popular Products report is sequenced to start with the most used/rented products that are in your inventory. The report can be used to help organize the warehouse so that popular items are easily accessible, while seldom used items can be moved to a corner or to the top shelves.

Additional options on the report allow you to narrow down the products you want to view based on their cost price or price per day. If your report is quite large, use the 'Only show top xx products' option. This returns the top number of products you specify.

Report Legend

- Days Using - Number of days product was in use for the specified time period. If there were 3 bookings and each booking was for 5 days, then the Days Using will be 15.
- Price Per Day - Is the average daily revenue for the specified time period. This value is determined by dividing Amount Earned by Days Using.
- Amount Earned - Is the total revenue from all bookings this product was on, in the specified time period.
- Net Earned - Is the total revenue minus any Sub hires, in the specified time period.
