

Product Movements

Last Modified on 23/03/2021 9:58 am EDT

The product movements report will show increases and decreases in stock quantity due to purchases, sales or transfers to and from another location.

Product movements can be viewed for a specific product, group or category, as well as for specific locations.

Use the date range to determine which transactions to include (for instance selecting the month of May will not show any purchases with an expected date in June).

The screenshot shows a dialog box titled "Product Movements Report" with a close button (X) in the top right corner. The dialog is organized into several sections:

- Sequence:** A group box containing four radio buttons: "Sequence Number", "Product Code", "Category Code", and "Group Code". The "Group Code" option is selected.
- Starting Group Code:** A text input field containing "AUDIO" with a small icon to its right.
- Ending Group Code:** A text input field containing "AUDIO" with a small icon to its right.
- Location Scope:** A group box containing two radio buttons: "All Locations" (selected) and "Select Location". Below "Select Location" is a dropdown menu showing "0 - Toronto".
- Print to:** A group box containing four radio buttons: "Printer", "Screen" (selected), "Word processor", and "CSV file".
- Select Dates:** A group box containing a "Select Month" section with twelve buttons for the months of the year (Jan, Feb, Mar, Apr, May, Jun, Jul, Aug, Sept, Oct, Nov, Dec), each with a small calendar icon. Below this are two date input fields: "Start Date (Inclusive)" with the value "2019-01-01" and "Ending Date (Inclusive)" with the value "2021-03-23".

At the bottom right of the dialog are two buttons: "OK" (with a green checkmark icon) and "Cancel" (with a red X icon).

The report will list the date of the transaction, booking or P.O. number and the quantity received or sent out. Totals are provided for each product.
