

# Product Utilization

Last Modified on 03/06/2022 3:00 pm EDT

Date: November 30, -0001

The Utilization report determines a percentage of time that an item was used within a specified time period. For example, say you ran the report for a period of 30 days. The utilization figure may display as 60% for a particular product. This means that you have used the product only 60% of the time, or the equivalent of 18 days total within the 30 day period. The calculation is as follows:

- $100 / (\text{days within period} \times \text{qty owned}) \times \text{total qty on booking}$

**Utilization Report**

Select Dates  
 Start Date (Inclusive): 3/ 1/2010  
 Ending Date (Exclusive): 6/ 1/2010
