Inventory Report of Assets (Maintenance Detail included)

Last Modified on 15/07/2025 10:48 am EDT

/*shows a list of all assets in inventory, their current status and if they're out on a booking. The report is sorted by group so you can easily separate it out into different reports as you see fit. This prevents you from having to run the guery many times with different group codes.*/

You can execute this query using Excel Query Builder in RentalPoint.....

```
SELECT I.groupfld
                         AS [Group],
    g.group_descv6
                         AS [Group Desc],
   i.category
                      AS [Category],
    c.cat descv6
                       AS [Category Desc],
