- PR5929 Added default mark up value for sales
- PR5931 Expanded character limit on Crew custom field
- PR5925 Schedule Daybook Display Issues fixed

12.0.22.27

- Synchronized release with RentalPoint3 (i.e. no functionality changes in RP2)

12.0.22.26 April 2024

- PR5565 Packed IN road case/rack status in Inventory tree was displaying the pack list information instead of the current location - fixed
- PR5888 Pricing Issue with currency in bookings
    - Show the Technician Rate in domestic currency. Then if the job is sub rented and the vendor currency is different, convert the tech currency to the vendor currency and display that rate.

12.0.22.25 - April 5th 2024

- PR5888 - Pricing issue with currency conversion in Bookings
    - By Design Findings
        - Crew with overridden rates do not get converted
        - Issue found with sales rates when flipping between currencies. if the sales item in question were already loaded within the booking they weren't converting the prices - FIXED
        - With anything that had a set rate there are a lot of instances of the number of days charged changing. -
          If the user enters a different days charged for a crew item, this is being reset to the default when the currency is changed and prices are recalculated.
        - Technician cost/extended price should be converted from domestic rate to the currency of the booking.
        - Also when creating a sub rental for the tech, the rate on the sub rental PO should be converted to the currency of the vendor.
    - Design Change
        - Client extended price is always re-calculated based on what is entered
            - When the user overrides the Days charged with a new value, the new days charged value is retained if currency changes are made.
            - When entering a sub rental for a crew item, if the currency of the vendor differs from the booking currency, then prices will be converted to the currency of the vendor in the PO.
        - Sales
            - If the user chooses to reload unit rates, the rates will be reloaded from the rate table before being converted to the new currency. Otherwise the entered value will be converted directly.

12.0.22.24 - March 23rd 2024

- PR1415 Accessories for accessories, components for components when building packages- (Work in Progress)
    - New option when adding an accessory or component to a package. If the product being added as an accessory or component also has accessories and/or components of its own, provide the user the option to add them to the package.
